INTRODUCTION

In a certain community we have done some analysis and we have identified the problem that in rural areas learners are struggling with how computer operate. We have therefor thought of creating an application that will have 3 functions namely

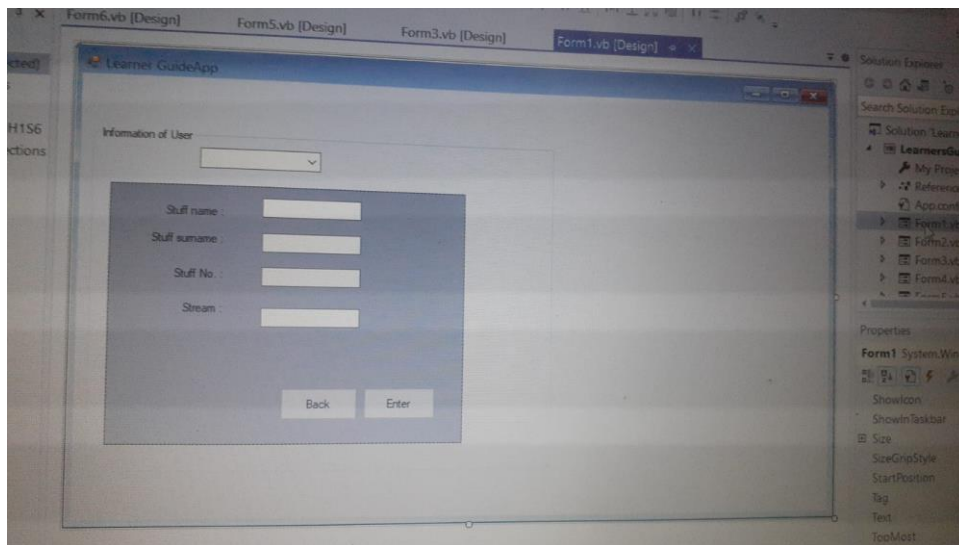

- Computer: whereby the will a background of computers and how they operate
- Internet: the interaction between computers and the internet
- Career: whereby learners will be educated that there is no limited career that a person can pursue so they will see many opportunities.

ABOUT THE APPLICATION

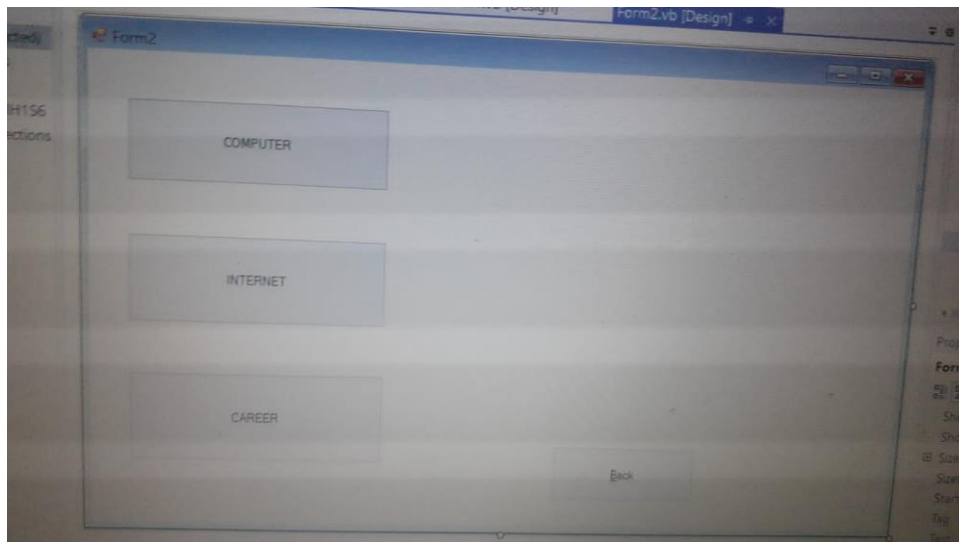

The applications have 3 users the Administrator, Learner, and the Teacher.

When logging to the application as the user the information that is shown below will displayed on the screen.

The user is required to choose before logging in that he/she is the admin, learner, or teacher

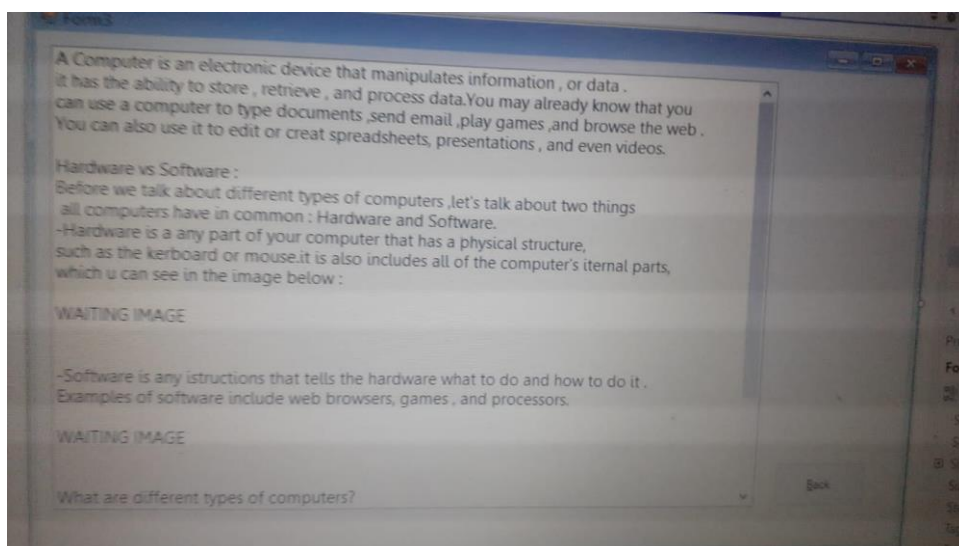

These are the 3 services rendered by the application:

COMPUTER

When selecting the buttons that are shown above (e.g.) computer the following information will be displayed on the screen:

- Download our application and start to advance your computer knowledge
- You will learn basic computer skills or computer literacy.
- We currently offer an introduction to computer. You will be able to learn both MS Word, Excel, PowerPoint, Database, and many more
- This application also offers key features like shortcuts keys

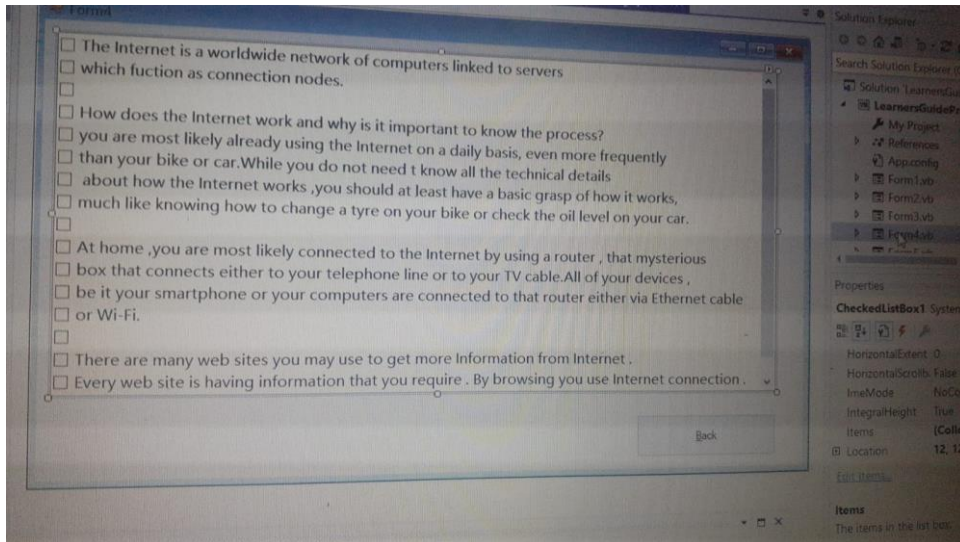

INTERNET

When selecting the Internet button, the information that is shown below will be displayed on the screen:

- Internet use to speedup daily task

- Communication
- Digital transactions
- Internet research and development
- Use of the internet for shopping
- Business promotion and innovation

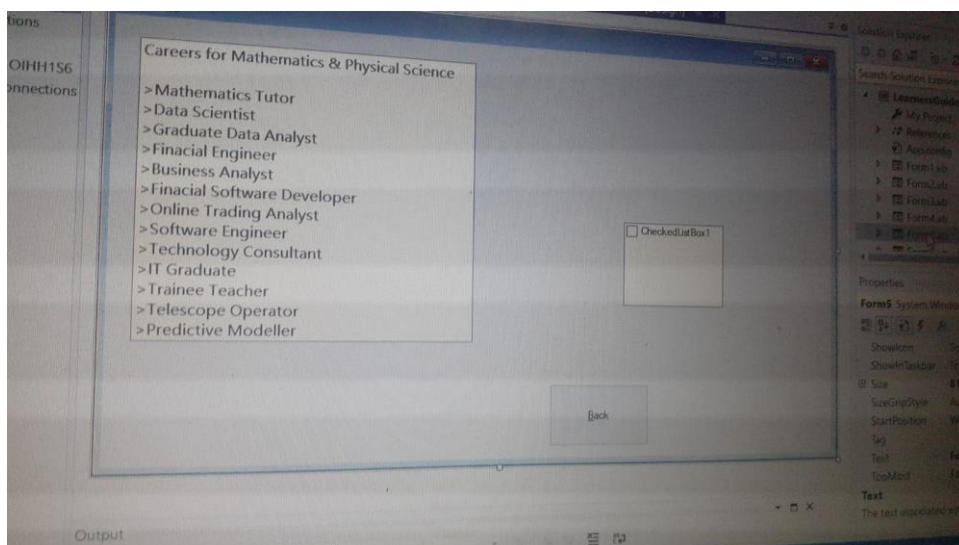

CAREER

When selecting button career the following information will be displayed on the screen:

Career: an occupation undertaken for a significant period of a person's life and with opportunities for progress.

In this application the role of career is to notify learners that we do not have limited careers so it will show learners the careers that can be enrolled and have high chances of employment.
